About Us

Enerxite Sdn. Bhd. (“Enerxite”) was incorporated on 20 May 2025, principally involved in provision of engineering, procurement, construction and commissioning (EPCC) for solar photovoltaic systems and investment in solar plant.

Enerxite, a subsidiary of UUE Holdings Bhd is a dedicated renewable energy company focused on providing sustainable and efficient solutions to commercial and industrial buildings, governmental buildings and residential homes in Malaysia with a core focus on solar photovoltaic (PV) systems. Backed by UUE Holdings Berhad’s expertise in engineering and infrastructure, we provide a full suite of services tailored to meet the unique energy needs of commercial, industrial, government, and residential sectors across Malaysia.

Enerxite, headquartered in Johor Bahru and branches in Malaysia, consists of a team of experts are prepared to deliver excellence and value-added services to the market. Driven by new policies, tax incentives, and commitment from the Malaysian government, the renewable energy sector is projected to have significant opportunities ahead. With the belief that clean energy is not only environmentally responsible but also economically viable, Enerxite is driven to bring sustainable and unique values to our customers.

Enerxite design, develop, and implement cutting-edge clean energy solutions that reduce carbon footprints, lower energy costs, and drive energy independence for businesses, communities, and governmental bodies. Our goal is to make renewable energy accessible, affordable, and reliable for all by harnessing the power of innovation, technology, and sustainable practices.

Enerxite also actively invests in and develops large scale solar power plants, contributing to the national renewable energy mix and creating long-term clean energy assets.

At Enerxite, we believe that our success is driven by the talent, passion, and dedication of our team. We foster a culture of collaboration, innovation, and inclusivity where every employee is empowered to grow, contribute, and make a meaningful impact. We ensure we have a diverse team as diverse perspectives drive creativity, innovation and inspiration.

We don't just provide clean energy solutions, we live it. We put in conscious effort to reduce carbon emission in our operations and activities. We also invest in clean energy research to push the boundaries of what's possible.

At Enerxite, we believe that clean energy is both environmentally responsible and economically viable. We design and implement smart energy systems that support national sustainability goals and enable energy independence for communities and businesses alike.

Enerxite is empowered by strong leadership and shared ESG values, positioning us as a driving force in Malaysia's clean energy future.

Vision, Mission & Value Statement

 **OUR VISION**

- To be the top energy company in Malaysia and eventually Asia.
- To be the leader in innovation and creation, bringing the best in people and technological advancement.

 **OUR MISSION**

- To power communities with high quality and clean energy whilst ensuring cost effectiveness.
- To create new solutions that will benefit the masses, ensuring a better and sustainable future.

 **OUR VALUE**

- Sustainability
- Passion
- Customer Centricity
- Innovation
- Teamwork
- Persistence and Perseverance
- Integrity & Accountability

Our Core Competencies

We provide turnkey EPCC services for renewable energy projects, handling every stage from design to grid connection. Our team ensures each installation meets industry standards, safety regulations, and performance expectations.

Engineering

Site assessments, energy yield analysis, structural and electrical designs tailored to each project's specific requirements.

Procurement

Sourcing premium-grade equipment and essential components from reputable and certified manufacturers to ensure long-term system reliability.

Construction

Professional installation by certified and experienced technicians, adhering to strict quality assurance and workplace safety standards throughout the entire process.

Commissioning

Comprehensive system testing, seamless integration with the utility grid, and performance verification to guarantee optimal energy output and system compliance.

Why Solar Power

Solar power is one of the most promising forms of renewable energy, harnessing the sun's natural and abundant energy to generate electricity and heat. As a clean and sustainable resource, solar power significantly reduces greenhouse gas emissions, making it a vital component in the fight against climate change.

The technology behind solar energy has advanced rapidly in recent years, resulting in more efficient solar panels at affordable price. Photovoltaic (PV) systems convert sunlight directly into electricity. The technologies offer various applications, from small-scale residential installations to large solar farms powering entire communities.

With abundant sunlight available in Malaysia, solar power offers an endless supply of clean energy, contributing to energy independence and security. As the world transitions towards a sustainable future, solar energy stands out as a key solution to meet growing energy demands while protecting the environment.

Why Us

- ✓ Specializes in end-to-end renewable energy solutions
- ✓ Strong technical and project management capabilities
- ✓ Provide full suite of services tailored to meet the unique energy needs of commercial, government buildings, industrial, and residential sectors
- ✓ Empowered by strong leadership and shared ESG values
- ✓ Creating value in everything that we do with the focus of ensuring maximum benefit to customers

Join us on the journey to a better, smarter, cleaner,
and more sustainable future.
